Mochamad Hilmy Febrian 20 years old, a dedicated and enthusiastic web developer. Have a solid foundation in HTML, CSS and JavaScript. With 2 years of experience in this field during college student, successfully created several simple web and application projects. Understand responsive design principles and strive to create seamless experiences across devices and browsers. Have skilled in using modern frameworks and libraries like React, to build dynamic and interactive interfaces. Always try to stay up to date with the latest trends and technologies to further my knowledge of the industry, and excited to help contribute my skills in creating engaging digital experiences.

PROJECT EXPERIENCE

ECO ENZYME WORKSHOP FOR HOUSEWIVES

The project group collaborate focuses on how to overcome chemical pollution and waste (e.g., food waste, industrial waste, household waste) which cause problems in natural ecosystems, especially water. The project teaches how to manage waste become zero waste actors, and we learn to manage event for collaborate with another major.

AI Recommender Website

This collaboration project with my group. Website its like catalog anime and help user for recommendation what he wants. For the AI use collaborative filtering and library use flask

ChatApp web

This project chatapp in web, its normaly chatapp web. For frontend I use ReactJS and for backend use Firebase(Authentication, Storage, Firestore Database, etc)

Search movie web

This project web movie, movie wrapper website that allows users to search for movies using an input search. The project utilizes the API from <https://www.themoviedb.org/>.

CRUD_Experiment

This simple CRUD use express and mysql for backend, and use simple react for interface frontend

UNETapp

UNETapp this chatapp development in android studio. I use programming language java for development and Backend Firebase to save information user and chat user
